**Condemning of Alvin Bragg's Indictment of
President Donald J. Trump**

Alvin Bragg, the George Soros funded New York Attorney General, has indicted President Trump on false criminal charges, and is using this as a political ploy. AG Bragg campaigned on the promise "I am going to get President Trump." It is another chapter in the Democratic book of plays to destroy Donald J. Trump, the one standing in their way. The endless witch hunts have failed and proven to be false, over and over. He is the first and only president to be impeached twice, raided by the FBI, indicted by a grand jury, wire-tapped by the FBI before taking office and banned from social media, yet he still has millions of supporters. Not one person from the Epstein Client list has been indicted. Where are the charges and indictments of Hunter Biden's numerous crimes: tax evasion, money laundering, porn with minors, obstruction of justice and collusion with Ukraine and Russia? Both Hillary Clinton and Joe Biden have committed treason, yet no charges or indictments. The evil Democrats are still working to stop President Trump from being able to run in the 2024 Presidential Campaign. This is a recon mission of the Democrats to retaliate against President Trump unexpectedly winning in the 2016 election and bringing their New World Order Plan to a halt. They had to step up their game during the 2020 election year to overcome the 75 million supporters of President Donald Trump in order to re-engage their ultimate plan for the New World Order. Now, coming up on the 2024 election, when President Trump is again gaining support, despite their many attempts to discredit and target him, they have another game plan.

Let it be known, that St. Clair County Republican Party condemns New York Attorney General Alvin Bragg and the false indictment against President Donald J. Trump.
